CURRICULUM VITAE

# Tom Kristian Abel

Founder & Principal Security Consultant at ProksiAbel OÜ — CTO at MatX.ee

tomkristianabel@gmail.com linkedin.com/in/hr-abel Estonia

## 01 About

Security researcher turned CTO. I started as a developer building systems before realizing it's a lot more fun to break them. My approach is architectural — I go after root causes, not individual vulnerabilities. That mindset won my team first place at the **FELLIN HÄKK 2026** hackathon. I work with engineering leaders who are done with security theater and want to actually harden their stack. Founder of ProksiAbel OÜ, now leading technology at MatX.ee.

## 02 Experience

### Chief Technology Officer

Feb 2026 — Present

MatX.ee

Estonia

FELLIN HÄKK 2026 Main Winning Team

### Founder & Principal Security Researcher

Jun 2024 — Present

ProksiAbel OÜ

- Spearheading high-impact cybersecurity research and offensive security consulting
- Enforcing robust protection protocols — turning weak code into hardened fortresses
- Building tools that counter next-generation social engineering attacks

### Independent Security Researcher

Jun 2021 — Present

Self-employed

- Pioneered offensive research methodologies and engineered novel attack vectors with custom analysis techniques
- Reverse-engineered complex JavaScript architectures, deconstructing obfuscated logic to uncover critical vulnerabilities
- Architected a Proof-of-Concept that bypassed a major platform's client-side bot detection and fingerprinting systems
- Built high-performance offensive tooling in Golang with concurrent frameworks for automated reconnaissance

### Software Developer

Sep 2019 — May 2021

Smaily — Email Marketing & Automation

Tallinn, Estonia

- Owned the development of integration plugins for popular platforms, driving user engagement and retention
- Implemented critical bug fixes across the plugin portfolio ensuring high performance and reliability
- Collaborated with product and support teams to deliver elegant solutions meeting client needs

## 03 Expertise

### SECURITY

- Offensive Security
- Penetration Testing
- Reverse Engineering
- Vulnerability Research
- Bot Detection Bypass
- Social Engineering

### ENGINEERING

- Golang
- JavaScript
- DevOps
- Database Optimization
- Performance Tuning
- Concurrent Systems

### LEADERSHIP

- CTO
- Security Architecture
- Technical Strategy
- Research & Development
- Team Building

## 04 Education

**Software Engineering Program** — 2026 – 2027
kood/Jõhvi

**Micro-degree — Software Engineering: Junior to Senior Developer** — Jan 2026 – May 2026
TalTech — Tallinn University of Technology

**Software Developer** — 2017 – 2020
Tallinn Polytechnic School

## 05 Languages
